

Eksportering - Omslag

Eksportering av Omslaget:

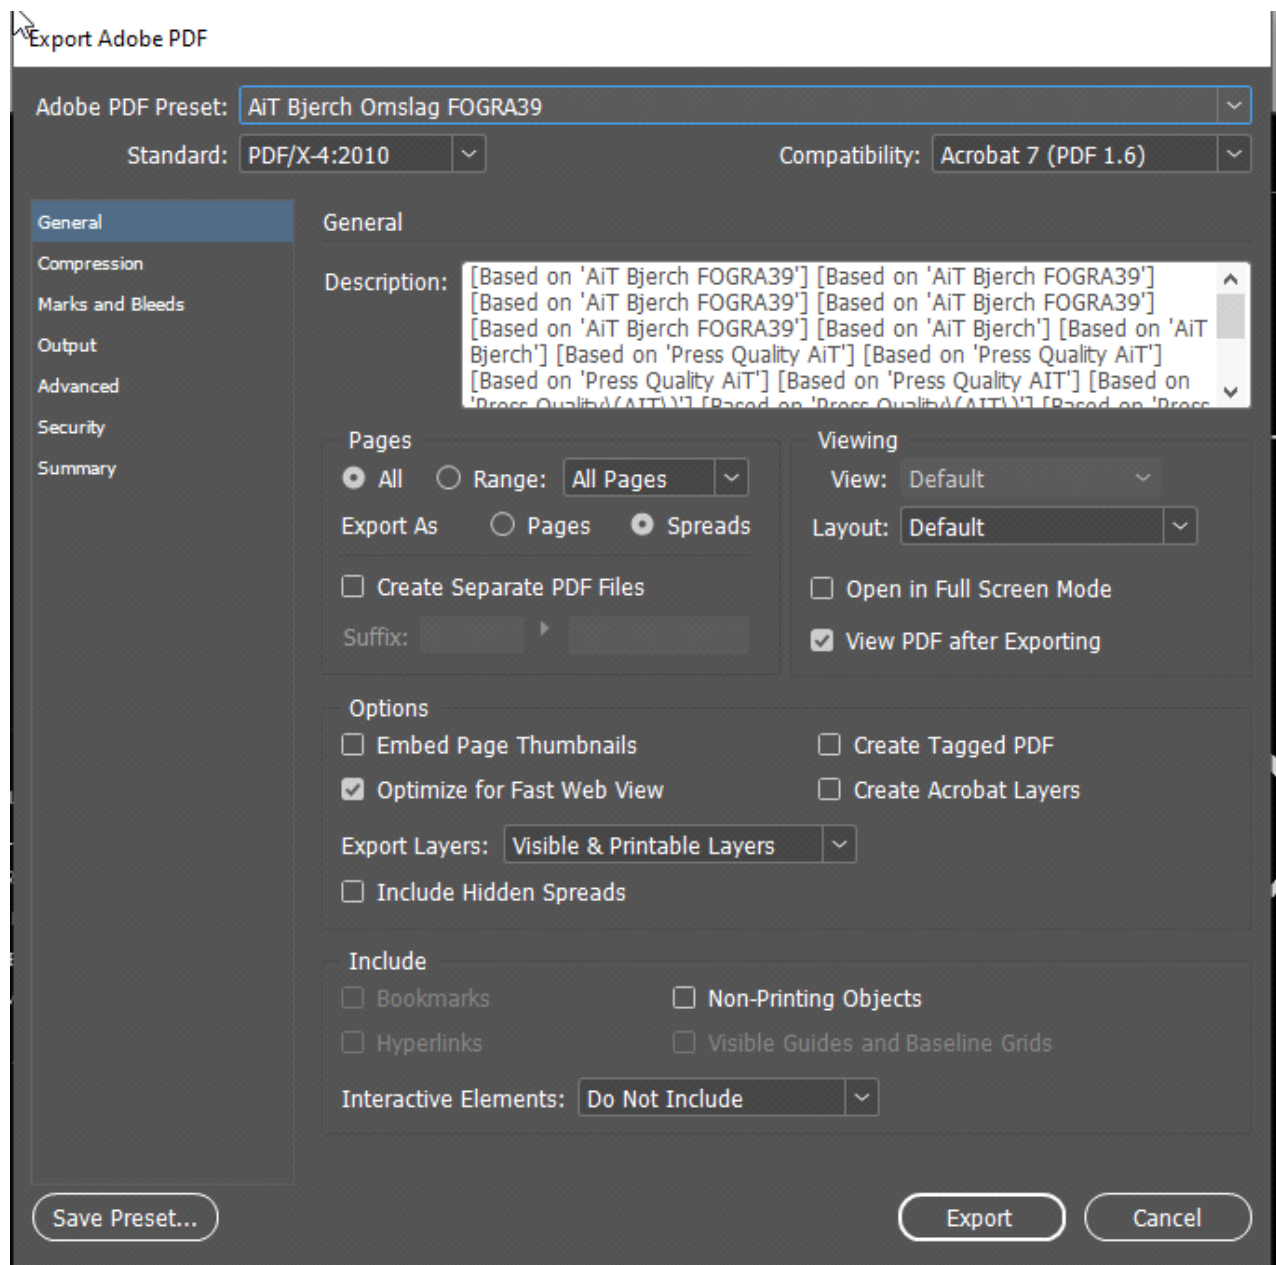

Omslaget skal alltid eksporteres som oppslag (Spreads) med bleed, hvis ikke annet er avtalt med prosjektleder.

Velg i menylinjen: File -> Export... (eller trykk "Ctrl" + "E").

Under "Filtype:", velg "Adobe PDF (Print)".

Vi bruker ofte de samme innstillingene og har et ferdig "Preset" (AiT Grafisk Omslag FOGRA39), du kan f.eks velge "High Quality print" under "Preset" og PDF/X-4:2010 under "Standard".

Velg "All" (hvis du skal eksportere alle sidene i dokumentet)

Velg "Range" (hvis du bare trenger et utvalg av sidene i dokumentet).

Huk av for "Spreads" (oppslag).

Hvis du huker av for "View PDF after Exporting" vil den dukke opp på skjermen når eksporten er ferdig.

Save Preset... **Export** **Cancel**

Under eksporten bevares, eller skales kvaliteten ned, dersom den er unødvendig høy.

Husk at trykkbildet bør være over 250 dpi/ppi i formatet det skal trykkes, så det er bedre å ha høyere kvalitet enn nødvendig og heller la InDesign skalere bildet under eksporten.

100% ser til at fontene som kan, blir lagret i pdf-filen, på den måten vet du at fonten blir lik som på din skjerm. (Hvis fonten ikke er lagret i filen kan maskinen erstatte den under trykk. Noe annet å huske på er at skrivefeil kan være vanskeligere å rette opp dersom vi ikke har tilgang til samme font som du benyttet i din pdf).
